## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The references listed on the 1449 received 30 November 2001 and 18 August 2003 have been reviewed and considered.

The non-patent references submitted in parent application 09/157,601 and listed on the 1449 of 30 November 2001 have been reviewed. However, the physical condition of these references is such that scanning them into the electronic file for the instant application is not possible. The Office will provide copies of the PCT documents for scanning. It is requested that Applicant supply copies of the non-US patents and non-PCT publications so that they may be scanned into the electronic file for the instant application.

### ***Specification***

2. The disclosure is objected to because of the following informalities:

The first paragraph of the specification has not been updated to reflect current status of parent applications.

Appropriate correction is required.

Art Unit: 1634

### ***Double Patenting***

3. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-27 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-27 of prior U.S. Patent No. 6,048,698. This is a double patenting rejection.

### ***Conclusion***

4. No claim is allowed.
